

KVH CommBox – Connecting Ships and Offices Worldwide

Highlights & Features:

- Uses the optimal compression, on a per-file basis.
- Reduces costs by reducing the amount of data sent and the time the file transfers require.
- One-to-many transfers for the convenience of transferring data or a document from the office to every vessel in the fleet.
- Synchronise files and folders using the highly efficient differential synchronisation function.
- Unlimited number of transfer jobs, for all vessels.
- Complete visibility thanks to transaction logs for each vessel.
- Advanced scripting features.
- Supports multiple protocols for fetching and delivering files, like FTP, CIFS, NAS, and e-mail.

KVH CommBox QuickFile is a CommBox software automated file transfer module that seamlessly and cost effectively transfers files to and from your vessels as if they were a part of your office network. Using QuickFile, you can set up directories or specific files to be synchronised from ship to shore and from shore to ship. Files are automatically compressed and delivered during your scheduled transfer.

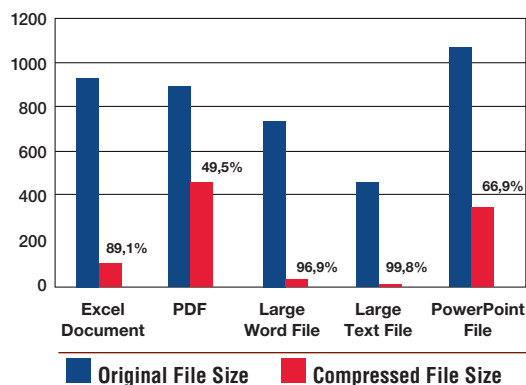

Secure Transfer

The QuickFile transfer system uses delivery notifications to keep you up to date on the status of your files. If there is a problem with delivery, you will receive a non-delivery notification and the system will automatically attempt to transfer the files with the next scheduled delivery.

QuickFile with Differential Synchronisation

CommBox also offers a differential file synchronisation algorithm (DiffSync), that further reduces the amount of data transferred over the links by only transferring new changes to the files. This ensures that files and folders can be kept fully synchronised, and cuts costs considerably by dramatically reducing the amount of data sent via your network.

Typical DiffSync uses include transferring and updating anti-virus software, general software upgrades, charts, databases, documents, and intranet content.

QuickFile Compression:

These average compression results illustrate QuickFile's compression capabilities even before utilising the DiffSync capability. With DiffSync cost savings and data reduction would be in the 99% range!

CommBox – The Ultimate Ship/Shore Network Manager

The fully configurable CommBox Ship/Shore Network Manager is the most complete network management tool available for mariners, offering unmatched solutions for optimisation, cost savings, and crew welfare.
