

# Unlock a World of Entertainment at Sea with KVH Link/linkHUB

Keeping crew engaged, informed, and entertained at sea is vital to crew morale. While people are used to streaming content on shore and new services like Starlink are reducing data costs, is streaming the best, most practical, or most affordable means of delivering news and entertainment to commercial seafarers?

## Streaming

1 hour of full HD (1080 dpi) streaming = 3 GB of data\*

20 people onboard enjoying just 1 hour of HD each per day =  
**1,800 GB of data per month!**

With 15+ crew members using individual streaming platforms, a 1TB plan will vanish quickly. One major tanker fleet’s experience with Starlink reveals throttling their usage to 1GB per crew member daily, insufficient to meet the needs of streaming services.

## KVH Link

No use of monthly data plan for streaming content!

Your crew can enjoy content and save their data for browsing =  
**0 GB of data per month!**

Save data on streaming with KVH Link, the all-in-one entertainment and crew wellbeing packages for crew enjoyment. KVH Link allows crew to directly watch their favorite movies, TV shows, music, and sports on demand. This frees up their data to browse the Internet and connect with friends and family ashore.

\* Popular Science, “How much data does streaming live TV use?”

## Exclusive Features for Seamless Entertainment

### All-in-One Solution

KVH Link/linkHUB is your vessel’s one-stop-shop for a diverse range of content, including news, sports, movies, TV shows, documentaries, viral clips, music, podcasts, and wellbeing clips

### Early Access Titles

Enjoy exclusive releases not available on mainstream streaming platforms for months or years.

### Cultural Diversity

Tailored for global crews, our content library includes World Cinema titles from India, Philippines, Greece, Eastern Europe, and beyond.

### Curation Sensitivity

In these uncertain times, we carefully curate content to respect cultural and political sensitivities, ensuring a harmonious onboard environment.

### License Compliance

All content is licensed for viewing at sea, a crucial factor for blue-chip companies seeking reliable entertainment solutions.

## Benefits for You and Your Crew:

**Crew Cohesion:** Installing KVH Link/linkHUB in recreational areas fosters social bonding, encouraging crew members to spend downtime together.

**Overcoming Restrictions:** Popular streaming services like Netflix and Amazon face increasing restrictions, with VPN use often banned in many countries. KVH Link/linkHUB offers a seamless and reliable alternative.

**MLC2006 Compliance:** Align with MLC2006 guidelines by providing your crew regularly updated entertainment libraries, contributing to their overall well-being during long sea journeys.
