

TRAININGlink™ Basic Training Package

Videotel Training Package offered exclusively to KVH IP-MobileCast subscribers

TRAININGlink for Videotel Basic Training Package

The Basic Training Package is a collection of 20 essential videos on seamanship that every crewmember on any kind of vessel should view and understand.

We selected these titles from the 950-program Videotel on Demand training library. In essence, they are Videotel's "must-see 20".

Each video is a concise, effective and memorable introduction to topics such as personal survival, firefighting, coping with hazardous weather, and emergencies in enclosed spaces. Use them to orientate new crew and to keep your officers and crew up-to-date with the latest regulations.

As a bonus, the subscription package also includes Videotel's program **Training Matters** free of charge!

Subscription is just US\$195/month with a minimum 1-year contract.

How are the videos delivered?

The videos are delivered by IP-MobileCast – a service for transmitting very large content files to ships at sea over the KVH mini-VSAT BroadbandSM space link. It's the same method that we used to broadcast the 2014 FIFA World Cup™ final match live, and to distribute an Ebola safety video created by Videotel free of charge to all of our IP-MobileCast subscribers.

What's required?

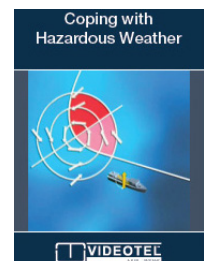

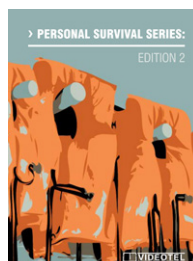

The Basic Training Package is available to subscribers of any IP-MobileCast Entertainment package or any mini-VSAT Broadband customer with a KVH Media Server. The videos are delivered to your TracPhone® antenna and stored on your KVH Media Server for viewing an unlimited number of times on TVs, iOS and Android devices, and computers. They'll be found under TRAININGlink in the Video On Demand listing of IP-MobileCast, alongside MOVIElink,™ TVlink,™ MUSIClink,™ SPORTSlink™ and NEWSlink.™

Your crew can watch the videos as part of group training in common areas or individually when they have free time.

Key: ▲ Emergency, Occupational Safety, Medical Care & Survival
 ▲ Maritime Training Courses
 ▲ Navigation

IP-MobileCast Onboard Installation

TRAININGlink for Videotel On Demand

With IP-MobileCast's TRAININGlink service, Videotel's flagship Videotel on Demand (VOD) and the networked version, NVOD, are better than ever. That's because subscribers to IP-MobileCast's TRAININGlink service receive course updates free of charge – delivered via multicasting directly to the vessel. That eliminates the cost and delays of sending course updates via couriers DVDs, which is the current practice with other training providers.

Videotel has taught seamanship to hundreds of thousands of seafarers for more than 40 years, using a mix of videos, animations, computer-based training (CBT), written coursework, and records management. Add Videotel's longstanding reputation for top-quality award-winning training content to the speed and efficiency of free course updates via IP-MobileCast, and ship operators benefit from a combination that is unsurpassed in the maritime training market today.
