

AgilePlans by KVH

KVH Industries announced the availability of AgilePlans by KVH, an all-inclusive Connectivity as a Service (CaaS) offering for maritime. For a single monthly fee, AgilePlans by KVH brings an advanced satellite communications solution onboard without a capital expenditure or long-term commitment. The subscription fee is as low as \$499/month for a complete package including hardware, connectivity, installation at select ports, entertainment and training content, and global support. The AgilePlans by KVH subscription model is designed to deliver everything a fleet needs for better communications and improved operational efficiency at sea.

AgilePlans by KVH is designed to enable customers to adjust quickly to changing market conditions and support fleet expansion or contraction as needed. For example, subscribers can end a subscription at any time without penalty. The AgilePlans subscriber need only notify KVH, return the onboard hardware, and the subscription will end.

The monthly subscription fee for AgilePlans by KVH includes all of the following:

- **Hardware:** Choice of KVH's TracPhone V7-IP or TracPhone V11-IP an-

tenna system; the below decks Integrated CommBox Modem (ICM); and required cables

- **Installation:** Free shipping to, and standard installation in select ports around the globe
- **Maintenance & Support:** Zero maintenance costs for the life of the subscription; KVH OneCare Global Technical Assistance Package; proactive performance monitoring

A Rugged, Proven Hardware Solution

Award-winning TracPhone® VSAT Terminals
Rely on years of trouble-free service when you choose either the HTS-ready 60 cm KVH TracPhone V7IP or the 1.1 m KVH TracPhone V11IP.

Free Shipping and Standard Installation
Enjoy free shipping to the vessel and free standard installation in select ports around the globe or up to a US\$2,000 per vessel credit toward shipping/installation elsewhere. Visit kvh.com/agileports for more details.

Implementation Plan
Be confident that your system installation is optimal, with complimentary field service and initial network design consultations.

Global Broadband Connections

The Fastest Network Speeds with the Most Affordable Data Plans
Stay connected with global, affordable satellite communications. KVH's groundbreaking usage-based plans deliver the fastest network speeds at all times (as fast as 4 Mbps shore-to-ship and up to 1 Mbps ship-to-shore).

Crystal-clear Voice Service
Pick up the phone and stay in touch, thanks to outstanding VoIP service wherever your vessels travel.

Superior Technical Support & Network Management

Global Technical Support
Optimize your SATCOM availability with KVH's Global Technical Assistance Package, zero maintenance costs for as long as you subscribe, and KVH Proactive Performance Monitoring, an industry first.

Secure Network Management
Manage your service, maximize uptime, and minimize costs via the secure myKVH™ Portal with tools that offer unmatched control over your data and how it is used.

Vessel Tracking Service
Achieve new levels of operational efficiency with mini-VSAT Broadband's new Vessel Tracking Service, which delivers real-time visibility into your vessels' locations and routes.

World-class Crew Welfare & Training Content

News, Sports, and Entertainment
Keep your crew connected to events at home and improve crew retention and morale with world and national news via NEWSlink™ TV and NEWSlink Print.

Videotel™ Basic Training Package
Boost your crew's productivity while reducing risk, thanks to the Videotel Basic Training Package. Choose from one of three 20-video STCW-related programs: Tankers, Dry Cargo, or Offshore vessels.

Critical Operations Content

CHARTlink™
Stay on course with KVH's CHARTlink service, which offers free delivery of updates from C-MAP™ and, soon, other leading providers for your ECDIS-compliant navigation data.

FORECASTlink™
Improve operational efficiency, optimize voyages, and ensure safety with high-resolution, global-scale weather updates from StormGeo BVS™ transmitted up to four times a day, and BVS updates whenever available via FORECASTlink.
